0.1 Context

0.2 Learned in this study

0.3 Things to explore

1 Overview

2 Notes

- Create a documented process
  - Identify the existing actions taken during the process
  - Link actions to one another to create sequences of state -> action -> state
- Determine the best course of action
- How to improve an existing process
  - Prefer breadth over depth for flexibility (multiple choices at once), depth over breadth for simplicity (step-by-step)
